Elm

- ► functional, strongly statically typed (with inference), reactive

- ► client-side web programming, browser as UI

- ► compiles to JavaScript, integrates with HTML/DOM, Canvas, WebGL, Markdown, other web technologies

- ► "FFI" to native JavaScript

- ► has some commercial backing (Prezi, companies using it)

- ► in language design, often a different philosophy than Haskell

- ► still much in flux (recently out: version 0.16)

- ► nice tools (e.g., time-travelling debugger)

- ► collection of community libraries
